

Tester	Ngô Hồng Thanh, Vương Ngũ Tín Thành, Nguyễn Thiên Nhã Trân, Tạ Thiên Lâm, Phan Nhật Anh	
Date	8/24/2025	
Use cases tested		26
Test cases		136
Passed test cases		117
Failed test cases		19

Defect ID	Defect Title	Defect Description	Feature ID	Related test cases	Severity	Reported by	Date Reported	Status
DF-SA-01	Logout not synced across tabs without refresh	The second tab only logs out after refreshing the page; otherwise, if the page isn't refreshed, the user can still proceed to book tickets, edit account,...	SA	SA-04	Medium	Hồng Thanh	08/03/2025	Open
DF-EA-01	API Message Format	The parameter "userId" does not received on back-end side.	EA	EA-02	High	Tín Thành	03/08/2025	Closed
DF-AI-01	Missing filtering date, branch	The chatbot identifies that it needs additional branch information to call the API.	AI	AI-03	Low	Thiên Lâm	03/08/2025	Open
DF-VH-01	Missing filtering option	No filtering options for the watch history	VH	VH-03	Low	Nhã Trân	03/08/2025	Open
DF-VH-02	Missing unauthorized navigation handling	Page doesn't navigate to log in page, when accessing the wishlist page without logging in	VH	VH-04	Medium	Nhã Trân	03/08/2025	Open
DF-VW-01	Missing unauthorized navigation handling	Page doesn't navigate to log in page, when accessing the watch history page without logging in	VW	VW-03	Medium	Nhã Trân	03/08/2025	Open
DF-BT-01	Unable to distinguish seat types	The system doesn't differenciate between the type of seats.	BT	BT-03	Low	Nhã Trân	03/08/2025	Closed
DF-CT-01	Missing Check-in Button and QR Scanner Functionality Issue	1. No "Check-in" button or confirmation option available after QR code scanning 2. QR scan functionality doesn't work properly on tablet interface 3. Unable to complete ticket check-in process despite ticket information displaying correctly 4. Missing final step to change ticket status from "Confirmed" to "Checkedin"	CT	CT-01	Medium	Nhật Anh	03/08/2025	Open
DF-CT-03	Missing Error Message for Already Checked-in Tickets	When attempting to check-in a ticket that has already been checked-in: 1. No error message is displayed to inform staff about the duplicate check-in attempt 2. System correctly blocks the check-in and maintains "Checkedin" status 3. Missing user feedback mechanism for invalid operations 4. Staff receives no visual indication that the operation failed due to ticket already being processed	CT	CT-03	Medium	Nhật Anh	03/08/2025	Open
DF-CT-04	Missing Validation and Error Handling for Cancelled Tickets	When attempting to check-in a cancelled ticket: 1. System does not provide any validation or error handling for cancelled ticket scenarios 2. No error message displayed (expected: "Cannot check-in a cancelled ticket.") 3. Missing "VALIDITY: INVALID" warning message 4. System lacks functionality to properly handle cancelled ticket check-in attempts 5. No validation logic implemented to prevent cancelled ticket processing	CT	CT-04	Medium	Nhật Anh	03/08/2025	Open

Defect ID	Defect Title	Defect Description	Feature ID	Related test cases	Severity	Reported by	Date Reported	Status
DF-VR-01	Missing Date Range Validation Error Message	When entering an invalid date range (Start Date later than End Date) on the report page: 1. No error message is displayed to inform users about the invalid date range 2. System does not provide feedback when Start Date > End Date 3. Missing validation message like "Invalid date range" 4. Users experience confusion as report may not update or show data without explanation 5. No visual indication that the date range input is incorrect	VR	VR-04	Medium	Nhật Anh	03/08/2025	Closed
DF-EM-01	Function name mismatch	Adding a movie is calling to createMovie, but the correct name is addMovie.	EM	EM-03	High	Tín Thành	02/08/2025	Closed
DF-EM-02	Error message	The error message have to be specified instead of an "500 Internal Server Error"	EM	EM-05	Low	Tín Thành	02/08/2025	Closed
DF-VA-01	Redundant branch selection	Administrator account does not require branch selection.	VA	VA-03	Low	Tín Thành	03/08/2025	Closed
DF-VA-02	API Message Format	The parameter "userId" does not received on back-end side.	VA	VA-04	High	Tín Thành	03/08/2025	Closed
DF-VA-03	API Message Format	The parameter "userId" does not received on back-end side.	VA	VA-05	High	Tín Thành	03/08/2025	Closed
DF-VA-04	Account Deletion Failed	Administrator cannot delete other account as the selection not caught.	VA	VA-06	High	Tín Thành	03/08/2025	Closed
DF-EP-01	API Message Format	The parameter "userId" does not received on back-end side.	EP	EP-02	High	Tín Thành	03/08/2025	Closed
DF-EP-03	API Message Format	The parameter "userId" does not received on back-end side.	EP	EP-03	High	Tín Thành	03/08/2025	Closed

Comment
The price is fixed at the 'standard' seating type, with couple seats equal to 2 'standard' seat.
Critical UX issue: Staff cannot complete check-in process. Ticket retrieval works but missing confirmation mechanism. QR scanner needs optimization for tablet devices. Blocks normal cinema operations.
UX issue: Staff cannot distinguish between successful and failed check-in attempts. While system logic works correctly (blocks duplicate check-ins), missing error messaging creates confusion. Should display clear warning like "Ticket already checked in" or "VALIDITY: INVALID" as specified in requirements.
Critical validation gap: System completely lacks cancelled ticket handling. This is a fundamental business rule violation - cancelled tickets should never be allowed for check-in. Missing both validation logic and user feedback mechanisms. Could lead to operational confusion and potential revenue issues if cancelled tickets are processed.

Comment
UX/Validation issue: Users cannot understand why reports are not generating or updating when they input invalid date ranges. The lack of error messaging creates confusion and poor user experience. System should validate date range logic and display clear error message like "Invalid date range" when Start Date is later than End Date.
