Master Test Plan

1. Introduction

1.1 Purpose

This Master Test Plan document serves as the central guiding document for all testing activities of the Lumiere Cinema website project. It comprehensively defines the strategies, methodologies, and procedures to be applied. The core objective is to ensure the website operates stably and securely, and delivers a flawless user experience for booking tickets and finding information, prior to its official launch. This document will specify the items to be tested, the environmental requirements, and the assignment of responsibilities for each team member.

Key feature:

- Account authentication
- Movie browsing and interaction
- Customer's purchasing flow
- Cashier's purchasing flow
- Staff management

All team members should have the responsibility to read and understand this document to test and check all the areas of features listed in this document. All the requirements and specifications for the testing plan are included in this document.

1.2 Scope

This Test Plan describes the overall strategy and approach for testing the Lumiere Cinema Website, including deployment of the product. It encompasses all phases of testing, from unit tests and system integration testing to user acceptance testing. The specific details of the testing activities for each phase will be outlined in the respective Test Report and Test Cases documents.

2. Target Test Items

In this project testing, we use some testing techniques:

- **Manual testing:** involves manual inspection and testing of the software by a human tester.
- **Functional testing:** tests the functional requirements of the software to ensure they are met.
- **Unit testing:** tests individual components of the software to ensure they are functioning as intended.
- **Usability testing:** tests the software to evaluate its user-friendliness and ease of use.
- **Automation testing:** tests the software by Katalon

Key features for testing:

ID	Feature Name	Description	Related Use-case
LA	Login account	Allows actor(s) to log into the system using their registered email and password.	LC-UC-2
EA	Edit account details	Customers can modify their personal information including name, birthday, phone number, and email. While administrators, with their access to a list of accounts, can then select an account to edit its desired information.	LC-UC-6
VL	View movie list	Allow actor(s) to view a list of now showing and upcoming movies, along with details such as synopsis, genre, showtimes, trailer, and screening schedules at different cinemas.	LC-UC-8
SM	Search movie	Enables the actor(s) to locate relevant movies in the system by specifying search criteria, enhancing	LC-UC-9

Lumiere Cinema	Version: 1.1
Master Test Plan	Date: 17/07/2025
lumiere-cinema-mtp-v1.1	

ID	Feature Name	Description	Related Use-case
		discoverability and navigation.	
AW	Add movie to wishlist	Add a movie to the user's wishlist for future tracking and booking. This action is performed from the movie detail page.	LC-UC-11
VW	View wishlist	Allows logged-in actor(s) to view the list of movies they have added to their wishlist in order to track and book them in the future.	LC-UC-12
VD	View movie details from list	The selected movie includes the trailer, synopsis, duration, genre, available languages and subtitles, age rating, screening schedule (by branch and time), and other relevant metadata.	LC-UC-13
BT	Buy ticket	Tickets can be purchased through two channels: cinema customers buying tickets online through the website, and cashiers selling tickets offline at the cinema counter for walk-in customers .	LC-UC-14
RM	Rate movie	This use case describes how a logged-in actor(s) can rate a movie they have previously watched. Only movies that the actor(s) has purchased and watched are eligible for rating.	LC-UC-16
CT	Check-in ticket	A ticket validator verifies the authenticity and validity of the actor(s)'s movie ticket, either through scanning a barcode/QR code or manual entry, to grant entry to the cinema screen.	LC-UC-17
SS	Schedule movie screening	Allows branch managers to schedule movie screenings in specific rooms at designated times. The system must detect conflicts in showtimes and display the updated schedule for users.	LC-UC-18
MP	Edit promotion list	Allows administrators to view, add, edit, or remove promotional campaigns. The system must ensure that promotions are applied accurately based on timeframes and applicable conditions.	LC-UC-21
EM	Edit movie list	The administrator can manage movies by adding licensed films to both the local database and website, controlling which database movies are displayed on the website, and removing movies from web display while maintaining them in the database.	LC-UC-22
VA	View account list	Administrators can view a list of all accounts within the system, along with key details and management options for each account.	LC-UC-23

Lumiere Cinema	Version: 1.1
Master Test Plan	Date: 17/07/2025
lumiere-cinema-mtp-v1.1	

ID	Feature Name	Description	Related Use-case
EP	Edit account permission	Administrators can assign/remove roles to a specific account from a list of available options.	LC-UC-24
EB	Edit branch list	Allows administrators to view, edit existing branch information and add new cinema branches to the system.	LC-UC-25
ES	Edit screen list	Branch managers can manage cinema screens/rooms within their branch, including setting room information, configuring seat layouts with rows and columns, and defining seat types with different pricing.	LC-UC-26

Other feature for testing:

ID	Feature Name	Description	Related Use-case
RA	Register account	Allows customers to register an account in the Lumiere Cinema system.	LC-UC-1
SA	Sign out of account	Allows the actor(s) to log out of the system securely and end the current session.	LC-UC-3
CP	Change password	Allows a logged-in actor(s) to change their current account password.	LC-UC-4
RP	Reset password	Allows actor(s) to reset their password when they forget it.	LC-UC-5
AI	Use AI-based chatbot	Enables actor(s) to interact with an AI chatbot for movie-related inquiries, including recommendations and movie details, using natural language.	LC-UC-7
VH	View watch history	Allows logged-in actor(s) to view their previously booked tickets, including movie details, cinema, showtime, seat selection, and payment status.	LC-UC-10
BS	Buy snack	Describes how snacks can be purchased by the actor(s) after they have selected their cinema tickets, or directly. The actor(s) selects desired snacks and quantities.	LC-UC-15
MS	View / Edit snack list	The actor(s) can manage snack inventory and sales operations including adding, creating items at the cinema.	LC-UC-19
VR	View revenue report	The actor(s) can access and analyze comprehensive revenue data including ticket sales, total earnings, and financial performance metrics across different time periods and movies.	LC-UC-20

3. Environmental Needs

As the website also aims to offer a responsive mobile experience, the website will be tested on both desktop and mobile environments.

3.1 Hardware Requirements

Requirement	Desktop Minimum Specifications	Mobile Minimum Specifications
Processor	Intel Core i3 or AMD Ryzen 3	Android: Snapdragon 450 iOS: Apple A9
RAM	8 GB	4 GB
Storage	10 GB of free storage	10 GB of free storage
Display	1920×1080	Android: 1080×2340 iOS: 828×1792

3.2 Software in the Test Environment

The following base software elements are required in the test environment for this *Test Plan*.

Software Name	Purpose	Version	Type and Other Notes
Microsoft Edge	To display the website for testing	Latest	Internet Browser
Firefox	To display the website for testing	Latest	Internet Browser
Google Chrome	To display the website for testing	Latest	Internet Browser
Safari	To display the website for testing	Latest	Internet Browser
Android	Android OS browser testing	Latest	Operating System
Windows	Use the productivity and support tools detailed in Productivity and Support Tools , desktop OS browser testing.	Window 10 or 11	Operating System
Linux	To host the back-end server	Depends on the specific linux-based OS	Operating System
iOS	iOS browser testing	17.5	Operating System

Lumiere Cinema	Version: 1.1
Master Test Plan	Date: 17/07/2025
lumiere-cinema-mtp-v1.1	

3.3 Productivity and Support Tools

The following tools will be employed to support the test process for this *Test Plan*.

Tool Category or Type	Tool Brand Name	Vendor or In-house	Version
Defect Tracking	Google Sheets	Google	Web-version 2025
Documentation	Google Docs	Google	Web-version 2025
Version Control	GitHub	GitHub	Web-version 2025
Tests Management	JIRA	Atlassian	Web-version 2025

4. Responsibilities, Staffing, and Training Needs

4.1 People and Roles

This table shows the staffing assumptions for the test effort.

Human Resources		
Role	Minimum Resources Recommended (number of full-time roles allocated)	Specific Responsibilities or Comments
Test Manager	1	Provides management oversight. Responsibilities include: • Planning and delivery document content • Commit to mission • Identify motivators • Acquire appropriate resources • Present management reporting • Advocate the interests of test • Evaluate effectiveness of test effort
Tester	3	Implements and executes the tests. Responsibilities include: • Implement tests and test suites • Execute test suites • Log the testing result • Analyze and recover from test failures • Analyze and recover from test failures • Review document incidents

Lumiere Cinema	Version: 1.1
Master Test Plan	Date: 17/07/2025
lumiere-cinema-mtp-v1.1	

Human Resources		
Role	Minimum Resources Recommended (number of full-time roles allocated)	Specific Responsibilities or Comments
Developer	2	Fixes reported defects and assists in tests. Responsibilities include: • Fix defects. • Support testers during retesting.
Test System Administrator	1	Ensures the test environment and assets are managed and maintained. Responsibilities include: • administer test management system • install and support access to, and recovery of, test environment configurations and test labs
