

Project: Lumiere Cinema
Team: 1

Version: 1.0
Date: 24/07/2025

Navigation tips: Clicking on the ID to navigate to its test cases.

ID	Feature Name	Description	Remark	Related Use-case	Category	Priority
RA	Register account	Allows actor(s) to register an account in the Lumiere Cinema system, with the permission role ‘Cinema customer’.		LC-UC-1	Account, Administration	Medium
LA	Login account	Allows actor(s) to log into the system using their registered email and password.		LC-UC-2	Account	High
SA	Sign out of account	Allows the actor(s) to log out of the system securely and end the current session.		LC-UC-3	Account	Medium
CP	Change password	Allows a logged-in actor(s) to change their current account password.		LC-UC-4	Account	Medium
RP	Reset password	Allows actor(s) to reset their password when they forget it.		LC-UC-5	Account	Medium
EA	Edit account details	Customers can modifies their personal information including name, birthday, phone number, and email. While, administrator, with their access to a list of accounts, can then select an account to edit its desired information.		LC-UC-6	Account, Administration	High
AI	Use AI-based chatbot	Enables actor(s) to interact with an AI chatbot for movie-related inquiries, including recommendations and movie details, using natural language.		LC-UC-7	Browsing	Medium
VL	View movie list	Allow actor(s) to view a list of now showing and upcoming movies, along with details such as synopsis, genre, showtimes, trailer, and screening schedules at different cinemas.		LC-UC-8	Browsing	High
SM	Search movie	Enables the actor(s) to locate relevant movies in the system by specifying search criteria, enhancing discoverability and navigation.		LC-UC-9	Browsing	High
VH	View watch history	Allows logged-in actor(s) to view their previously booked tickets, including movie details, cinema, showtime, seat selection, and payment status.		LC-UC-10	Movie interaction	Medium
AW	Add movie to wishlist	Add a movie to user's wishlist for future tracking and booking. This action is performed from the movie detail page.		LC-UC-11	Movie interaction	High
VW	View wishlist	Allows logged-in actor(s) to view the list of movies they have added to their wishlist in order to track and book them in the future.		LC-UC-12	Movie interaction	High
VD	View movie details from list	The selected movie includes the trailer, synopsis, duration, genre, available languages and subtitles, age rating, screening schedule (by branch and time), and other relevant metadata.		LC-UC-13	Browsing	High
BT	Buy ticket	Tickets can be purchased through two channels: cinema customers buying tickets online through the website, and cashiers selling tickets offline at the cinema counter for walk-in customers .		LC-UC-14	Movie interaction	High
BS	Buy snack	Describes how snacks can be purchased by the actor(s) after they have selected their cinema tickets, or directly. The actor(s) selects desired snacks and quantities.		LC-UC-15	Movie interaction	Medium
RM	Rate movie	This use case describes how a logged-in actor(s) can rate a movie they have previously watched. Only movies that the actor(s) has purchased and watched are eligible for rating.		LC-UC-16	Movie interaction	High
CT	Check-in ticket	A ticket validator verifies the authenticity and validity of the actor(s)'s movie ticket, either through scanning a barcode/QR code or manual entry, to grant entry to the cinema screen.		LC-UC-17	Management	High
SS	Schedule movie screening	Allows branch manager to schedule movie screenings in specific rooms at designated times. The system must detect conflicts in showtimes and display the updated schedule for users.		LC-UC-18	Management	High
MS	View / Edit snack list	The actor(s) can manage snack inventory and sales operations including adding, creating items at the cinema.		LC-UC-19	Management	Medium
VR	View revenue report	The actor(s) can access and analyze comprehensive revenue data including ticket sales, total earnings, and financial performance metrics across different time periods and movies.		LC-UC-20	Management, Administration	Medium
MP	View / Edit promotion list	Allows administrators to view, add, edit, or remove promotional campaigns. The system must ensure that promotions are applied accurately based on timeframes and applicable conditions.		LC-UC-21	Administration	High
EM	Edit movie list	The administrator can manage movies by adding licensed films to both the local database and website, controlling which database movies are displayed on the website, and removing movies from web display while maintaining them in the database.		LC-UC-22	Administration	High
VA	View account list	Administrator can views a list of all accounts within the system, along with key details and management options for each account.		LC-UC-23	Administration	High
EP	Edit account permission	Administrator can assign/remove roles to a specific account from a list of available options.		LC-UC-24	Administration	High
EB	View / edit branch list	Allows administrators to view, edit existing branch information and add new cinema branches to the system.		LC-UC-25	Administration	High
ES	View / edit screen list	Branch manager can manage cinema screens/rooms within their branch, including setting room information, configuring seat layouts with rows and columns, and defining seat types with different pricing.		LC-UC-26	Management	High

Feature ID	Case ID	Test case name	Test step	Expected Result (ER)	Actual Result	Status	Tester	Tested Date	Tested Environment	Defects / Remark
Function 1: Register account										
RA	RA-01	Successful registration	1. Navigate to the registration page 2. Enter "John Smith" in the Name field 3. Select "1990-01-15" in the Birthday field 4. Select "Male" from the Gender dropdown 5. Enter "john.smith@gmail.com" in the Email field 6. Enter "0901234567" in the Phone Number field 7. Enter "Password123!" in the Password field 8. Enter "Password123!" in the Retype Password field 9. Click the "REGISTER" button	User successfully registers with role 'Cinema customer', receives confirmation message, and is redirected to the appropriate page with authentication token.	Successfully registers and email sent.	Passed	Hồng Thanh	03/08/2025	Desktop, Mobile	
RA	RA-02	Real-time validation for invalid email format	1. Navigate to the registration page 2. Enter "Jane Doe" in the Name field 3. Select "1995-05-20" in the Birthday field 4. Select "Female" from the Gender dropdown 5. Click in the Email field and type "invalid-email" (missing @ and domain) 6. Click outside the Email field or press Tab to trigger validation	Error message "Please enter a valid email address" appears immediately below the Email field with red styling, and the email field border turns red.	The error message appears immediately below the Email field when the input is in the wrong format, but after deleting all characters and leaving the field empty, the message still remains visible.	Passed	Hồng Thanh	03/08/2025	Desktop, Mobile	
RA	RA-03	Registration with mismatched passwords	1. Navigate to the registration page 2. Enter "Bob Johnson" in the Name field 3. Select "1988-12-10" in the Birthday field 4. Select "Male" from the Gender dropdown 5. Enter "bob.johnson@yahoo.com" in the Email field 6. Enter "0923456789" in the Phone Number field 7. Enter "Password123!" in the Password field 8. Click in the Retype Password field and type "DifferentPassword!" 9. Click outside the Retype Password field or press Tab	Error message "Passwords do not match" appears immediately below the Retype Password field with red styling, and the retype password field border turns red.	Same as ER.	Passed	Hồng Thanh	03/08/2025	Desktop, Mobile	
RA	RA-04	Registration fails when email or phone already exists	1. Navigate to the registration page 2. Enter "Mike Wilson" in the Name field 3. Select "1985-03-12" in the Birthday field 4. Select "Male" from the Gender dropdown 5. Enter "existing.user@gmail.com" in the Email field (email already registered) 6. Enter "0945678901" in the Phone Number field 7. Enter "Password123!" in the Password field 8. Enter "Password123!" in the Retype Password field 9. Click the "REGISTER" button	Registration fails, server returns error message "Email or phone number already exists", and user is prompted to use different credentials.	Same as ER.	Passed	Hồng Thanh	03/08/2025	Desktop, Mobile	
Function 2: Login account										
LA	LA-01	Valid user login with correct email and password	1. Navigate to the login page 2. Enter "john.smith@gmail.com" in the Email field 3. Enter "Password123!" in the Password field 4. Click the "LOGIN" button	User successfully logs in, receives authentication token, user data (id, name, email, roles) is returned, and user is redirected to the appropriate dashboard.	Same as ER.	Passed	Hồng Thanh	03/08/2025	Desktop, Mobile	
LA	LA-02	Login failure with invalid email format	1. Navigate to the login page 2. Click in the Email field and type "invalid-email" 3. Click outside the Email field to trigger validation	Error message "Please enter a valid email address" appears immediately below the Email field with red styling.	Same as ER.	Passed	Hồng Thanh	03/08/2025	Desktop, Mobile	

Feature ID	Case ID	Test case name	Test step	Expected Result (ER)	Actual Result	Status	Tester	Tested Date	Tested Environment	Defects / Remark
LA	LA-03	Login failure with incorrect credentials	1. Navigate to the login page 2. Enter "john.smith@gmail.com" in the Email field 3. Enter "WrongPassword123!" in the Password field 4. Click the "LOGIN" button	Server returns error message "Email or password is incorrect" (status 401), login fails, and user remains on login page.	Same as ER.	Passed	Hồng Thanh	03/08/2025	Desktop, Mobile	
LA	LA-04	Staff credentials rejection on customer login page	1. Navigate to the customer login page 2. Enter staff account credentials (e.g., "admin@lumierecinema.com") 3. Enter correct password for that staff account 4. Click the "LOGIN" button	Login fails with error message "Email or password is incorrect" (status 401), even though the credentials are valid for staff login. User remains on customer login page.	Server-side does not reveal this is staff account.	Passed	Tín Thành	03/08/2025	Desktop, Mobile	
LA	LA-05	Staff login with appropriate role-based dashboard access	1. Navigate to the staff login page 2. Enter staff account credentials (e.g., "admin@lumierecinema.com") 3. Enter correct password 4. Click the "LOGIN" button	Staff user successfully logs in, receives authentication token with staff roles (administrator, manager, etc.), and is redirected to staff dashboard with appropriate sidebar menu options based on their specific role.	Allowed functions for each role are displayed correctly on sidebar menu. After logged-in, administrator & branch manager is redirected to "View Report" function; cashier is redirected to "Sell ticket"; and checkin counter is redirected to "Checkin ticket".	Passed	Tín Thành	03/08/2025	Desktop, Mobile	
Function 3: Sign out of account										
SA	SA-01	Customer successfully signs out and session ends	1. Log into the customer portal with valid credentials 2. Navigate to any page in the customer dashboard 3. Click on the "Sign Out" or "Logout" button/link in the navigation menu 4. Confirm sign out if prompted	User is successfully logged out, authentication token is invalidated, session ends, and user is redirected to the customer login page. Any attempt to access protected customer pages should redirect to login.	User is successfully logged out and user is maintained on current screen. Any other attempt to access protected customer pages redirect to login.	Passed	Hồng Thanh	03/08/2025	Desktop, Mobile	
SA	SA-02	Staff successfully signs out and session ends	1. Log into the staff portal with valid administrator credentials 2. Navigate to any page in the staff dashboard 3. Click on the "Sign Out" or "Logout" button/link in the navigation menu 4. Confirm sign out if prompted	Staff user is successfully logged out, authentication token is invalidated, session ends, and user is redirected to the staff login page. Any attempt to access protected staff pages should redirect to landing page.	Same as ER but redirect to staff login page	Passed	Hồng Thanh	03/08/2025	Desktop, Mobile	
SA	SA-03	Authentication token properly invalidated on sign out	1. Log into the system with valid credentials 2. Note the authentication token (from localStorage/sessionStorage or cookies) 3. Click the "Sign Out" button 4. Attempt to make an API call using the old token 5. Try to access a protected route directly via URL	Token is removed from client-side storage, server rejects API calls with the old token (401 Unauthorized), and direct access to protected routes redirects to login page	redirects to landing page	Passed	Hồng Thanh	03/08/2025	Desktop, Mobile	
SA	SA-04	Sign out affects all open sessions	1. Log into the system in the first browser tab. 2. Open a second tab and navigate to the same system (should be automatically logged in). 3. From the first tab, click "Sign Out". 4. Switch to the second tab and try to perform any action or refresh the page.	Sign out from one tab invalidates the session across all tabs. The second tab should redirect to login page when trying to access protected content or upon refresh. For enhanced security, the tab should redirect to landing page when accessing staff's content.	The second tab only logs out after refreshing the page; otherwise, if the page isn't refreshed, the user can still proceed to book tickets, edit account,...	Failed	Hồng Thanh	03/08/2025	Desktop	
Function 4: Change password										

Feature ID	Case ID	Test case name	Test step	Expected Result (ER)	Actual Result	Status	Tester	Tested Date	Tested Environment	Defects / Remark
CP	CP-01	Successful password change with valid data	1. Log into the system with valid credentials 2. Navigate to the profile/account settings page 3. Click on "Change Password" or similar option 4. Enter current password "OldPassword123!" in the "Current Password" field 5. Enter new password "NewPassword456!" in the "New Password" field 6. Enter "NewPassword456!" in the "Confirm New Password" field 7. Click confirmation button	Password is successfully updated, user receives confirmation message "Password changed successfully", and user can log in with the new password on next login attempt.	Same as ER	Passed	Hồng Thanh	03/08/2025	Desktop	
CP	CP-02	Password change fails with wrong current password	1. Log into the system with valid credentials 2. Navigate to the password change form 3. Enter incorrect current password "WrongPassword123!" in the "Current Password" field 4. Enter new password "NewPassword456!" in the "New Password" field 5. Enter "NewPassword456!" in the "Confirm New Password" field 6. Click confirmation button	Password change fails with error message "Current password is incorrect" (status 400), password remains unchanged, and user stays on the password change form.	Same as ER	Passed	Hồng Thanh	03/08/2025	Desktop	
CP	CP-03	Real-time validation for password confirmation mismatch	1. Log into the system with valid credentials 2. Navigate to the password change form 3. Enter anything in the "Current Password" field 4. Enter "NewPassword456!" in the "New Password" field 5. Enter "DifferentPassword789!" in the "Confirm New Password" field 6. Click outside the confirm password field to trigger validation	Error message "New passwords do not match" appears immediately below the "Confirm New Password" field with red styling, and the form cannot be submitted.	Same as ER, but after deleting all characters and leaving the field empty, the message still remains visible.	Passed	Hồng Thanh	03/08/2025	Desktop	
CP	CP-04	Validation for weak password requirements	1. Log into the system with valid credentials 2. Navigate to the password change form 3. Enter correct current password in the "Current Password" field 4. Enter weak password "12345" in the "New Password" field (too short, no uppercase, no symbols) 5. Enter "12345" in the "Confirm New Password" field 6. Click outside the new password field to trigger validation	Error message "Password must be at least 6 characters long" appears immediately below the "New Password" field with red styling, and the form cannot be submitted.	Same as ER, but after deleting all characters and leaving the field empty, the message still remains visible.	Passed	Hồng Thanh	03/08/2025	Desktop	
CP	CP-05	Prevention of setting same password as current	1. Log into the system with valid credentials 2. Navigate to the password change form 3. Enter correct current password "CurrentPassword123!" in the "Current Password" field 4. Enter the same password "CurrentPassword123!" in the "New Password" field 5. Click outside the "New Password" field or press Tab to trigger validation	Error message "New password must be different from current password" appears immediately below the "New Password" field with red styling, the new password field border turns red, and the form cannot be submitted until a different password is entered.	Same as ER	Passed	Hồng Thanh	03/08/2025	Desktop	
Function 5: Forgot password										

Feature ID	Case ID	Test case name	Test step	Expected Result (ER)	Actual Result	Status	Tester	Tested Date	Tested Environment	Defects / Remark
RP	RP-01	Successful password reset request	1. Navigate to the reset password page at /reset-password 2. Enter valid registered email address in the "Email" field 3. Click "SEND EMAIL" button 4. Check email inbox for reset password email from Lumiere Cinema 5. Click on the reset link in the email (redirects to /reset-password/confirm?token=xyz) 6. Enter new strong password "NewPass123!" in "New password" field 7. Enter "NewPass123!" in "Re-type new password" field 8. Click "CONFIRM" button	Password is successfully reset, green success message "Password reset successful." appears, user is automatically redirected to login page after 2 seconds, and can log in with the new password.	Same as ER	Passed	Hồng Thanh	03/08/2025	Desktop	
RP	RP-02	Password reset with expired reset token	1. Navigate to the reset password page at /reset-password 2. Enter valid registered email address and click "SEND EMAIL" 3. Wait for reset token to expire 4. Click on the expired reset link from email 5. Enter new password "NewPass123!" in "New password" field 6. Enter "NewPass123!" in "Re-type new password" field 7. Click "CONFIRM" button	Red error message "Invalid or expired reset token." appears in the message area, and the password is not reset.	Same as ER	Passed	Hồng Thanh	03/08/2025	Desktop	
RP	RP-03	Password reset with weak password requirements	1. Navigate to the reset password page at /reset-password 2. Enter valid registered email address and click "SEND EMAIL" 3. Click on valid reset link from email 4. Enter weak password "123" in the "New password" field 5. Click outside the new password field to trigger validation	Red error message "Password must have at least 8 characters, including uppercase, lowercase, numbers and special characters." appears immediately below the "New password" field with red styling, and the form cannot be submitted.	Same as ER	Passed	Hồng Thanh	03/08/2025	Desktop	
RP	RP-04	Password reset with mismatched password confirmation	1. Navigate to the reset password page at /reset-password 2. Enter valid registered email address and click "SEND EMAIL" 3. Click on valid reset link from email 4. Enter strong password "NewPass123!" in the "New password" field 5. Enter different password "NewPass456!" in the "Re-type new password" field 6. Click outside the confirm password field to trigger validation	Red error message "Passwords do not match" appears immediately below the "Re-type new password" field with red styling, and the form cannot be submitted until passwords match.	Same as ER	Passed	Hồng Thanh	03/08/2025	Desktop	
RP	RP-05	Password reset with invalid or tampered token	1. Navigate directly to /reset-password/confirm?token=invalid-token-123 2. Enter new password "NewPass123!" in "New password" field 3. Enter "NewPass123!" in "Re-type new password" field 4. Click "CONFIRM" button	Red error message "Invalid or expired reset token." appears in the message area, and the password is not reset.	Same as ER	Passed	Hồng Thanh	03/08/2025	Desktop	
Function 6: Edit Account Details										

Feature ID	Case ID	Test case name	Test step	Expected Result (ER)	Actual Result	Status	Tester	Tested Date	Tested Environment	Defects / Remark
EA	EA-01	Customer successfully edits their own account details	1. Customer logs in to their account 2. Navigate to profile/account settings page 3. Edit "Name" field from "John Smith" to "John William Smith" 4. Edit "Phone Number" field from "0912345678" to "0987654321" 5. Edit "Birthday" field from "1990-01-01" to "1992-05-15" 6. Edit "Gender" dropdown from "Male" to "Other" 7. Click "Save Changes" or "Update Profile" button	Green success message "Profile updated successfully" appears, account information is updated in the database, and the new information is displayed on the profile page.	Same as ER	Passed	Hồng Thanh	03/08/2025	Desktop	
EA	EA-02	Administrator edits another user's account details and roles	1. Administrator logs in to staff portal 2. Navigate to /staff/account (Account Management page) 3. Click "Edit" button for a customer account (e.g., "Nguyễn Thiên Nhã Ra") 4. Update "Name" field to "Nguyễn Thiên Nhã Ra (Updated)" 5. Update "Email" field to "updated.email@example.com" 6. Update "Phone Number" field to "0999888777" 7. Change role from "Customer" to "Cashier" by checking the Cashier checkbox 8. Click "CONFIRM" button	Account information is successfully updated, role is changed from Customer to Cashier, and the updated information appears in the account list table.	Edit account failed.	Failed	Tín Thành	03/08/2025	Desktop	PATCH /api/admin/users/:userId 404 (Not found)
EA	EA-03	Edit account with invalid phone number format	1. Customer logs in to their account 2. Navigate to profile/account settings page 3. Edit "Phone Number" field to invalid format "123456" 4. Click outside the phone number field to trigger validation	Red error message "Please enter a valid Vietnamese phone number" appears immediately below the "Phone Number" field with red styling, and the form cannot be submitted.	Same as ER	Passed	Hồng Thanh	03/08/2025	Desktop	
EA	EA-04	Administrator edits account with role restrictions	1. Administrator logs in to staff portal 2. Navigate to /staff/account (Account Management page) 3. Click "Edit" button for a staff account 4. Try to select both "Customer" and "Cashier" roles simultaneously 5. Observe the role selection behavior	When "Customer" role is selected, all other roles are automatically deselected (as per the role logic in EditAccountInformationModal), and when other roles are selected, "Customer" role is automatically deselected, ensuring proper role hierarchy.	Same as ER	Passed	Tín Thành	03/08/2025	Desktop	Note that the behaviour updated as ER, but still cannot save changes (see EA-02).
Function 7: Use AI-based chatbot										
AI	AI-01	Open chatbot from any screen	1. Navigate to any page on the website (e.g., Homepage, Movie Detail, Booking). 2. Click the chatbot icon (message symbol) at bottom-right.	A chat window appears, ready for user input.	The same with ER	Passed	Thiên Lâm	03/08/2025	Desktop, Mobile	
AI	AI-02	Ask for movie recommendation	1. Open the chatbot. 2. Type "Recommend me a good action movie". 3. Press Enter.	The chatbot responds with 2–3 movie recommendations of action genre.	The same with ER	Passed	Thiên Lâm	03/08/2025	Desktop, Mobile	
AI	AI-03	Ask for movie showtimes	1. Open the chatbot. 2. Type "What time is Oppenheimer showing today?". 3. Press Enter.	The chatbot returns today's showtimes for Oppenheimer.	The chatbot doesn't remember the context of the last few messages. After the first question, it asks me to determine the branch. I told it the branch, but the movie information wasn't cached yet.	Failed	Thiên Lâm	03/08/2025	Desktop, Mobile	
AI	AI-04	Ask unrelated/general question	1. Open the chatbot. 2. Type "What's the weather in Hanoi?". 3. Press Enter.	The chatbot replies politely that it only handles movie-related inquiries.	The same with ER	Passed	Thiên Lâm	03/08/2025	Desktop, Mobile	

Feature ID	Case ID	Test case name	Test step	Expected Result (ER)	Actual Result	Status	Tester	Tested Date	Tested Environment	Defects / Remark
AI	AI-05	Chatbot unavailable (system failure test)	1. Simulate backend AI service being down. 2. Click chatbot icon. 3. Try sending a message.	User sees an error message like “Chatbot is currently unavailable. Please try again later.”	The same with ER	Passed	Thiên Lâm	03/08/2025	Desktop, Mobile	
Function 08: View movie list										
VL	VL-01	View full "Now Showing" movie list (Movies exist)	1. Navigate to the Lumiere homepage 2. Scroll down to the "NOW SHOWING" section. 3. Click 'SEE MORE' button	The user is navigated to a new page showing the complete list of "Now Showing" movies.	The same with ER	Passed	Thiên Lâm	03/08/2025	Desktop, Mobile	
VL	VL-02	View full "Upcoming" list (Movies exist)	1. Navigate to the Lumiere homepage 2. Scroll down to the "UP COMING" section. 3. Click 'SEE MORE' button	The user is navigated to a new page showing the complete list of "Upcoming" movies	The same with ER	Passed	Thiên Lâm	03/08/2025	Desktop, Mobile	
VL	VL-03	View "Now Showing" movie list (No movies)	1. Navigate to the "Now Showing" movies list page. 2. Scroll down to the "Now Showing" section.	The page loads successfully and displays a user-friendly message notify that no movies available	The same with ER	Passed	Thiên Lâm	03/08/2025	Desktop, Mobile	
VL	VL-04	View "Upcoming" movie list (No movies)	1. Navigate to the "UP COMING" movies list page. 2. Scroll down to the "UP COMING" section.	The page loads successfully and displays a user-friendly message notify that no movies available	The same with ER	Passed	Thiên Lâm	03/08/2025	Desktop, Mobile	
Function 09: Search movie										
SM	SM-01	Search with a relevant keyword	1. Navigate to the search bar. 2. Enter a keyword that is known to match one or more movie titles. 3. Initiate the search.	1. The system displays a list of results. 2. The results are sorted by relevance, with the best matches appearing at the top.			Thiên Lâm			
SM	SM-02	Search with a keyword containing a typo	1. Navigate to the search bar. 2. Enter a movie title with a one-character misspelling. 3. Initiate the search.	The system tolerates the minor typo and still returns the intended movie in the search results.			Thiên Lâm			
SM	SM-03	Search with a keyword matching non-title fields	1. Navigate to the search bar. 2. Enter the name of an actor or director known to be in the database. 3. Initiate the search.	The system correctly returns movies associated with the actor/director, demonstrating multi-field search capability.			Thiên Lâm			
SM	SM-04	Search with a keyword that matches no movies	1. Click on the search bar. 2. Enter a random keyword like "xyzabc". 3. Initiate the search.	The page displays a message: "No movies found".			Thiên Lâm			
Function 10: View watch history										
VH	VH-01	Successfully Watch history retrieval	1. Setup: Login as customer with valid authentication credentials 2. Precondition: Verify customer has previously booked tickets 3. Navigate to user profile/account section and click "Watch History" option 4. Verify displayed information includes: + Movie title, poster, genre, duration from populated Movie reference + Cinema branch and screen from populated Schedule reference + Showtime (schedule.startTime), seat selection (seats array) + Ticket status ('Confirmed', 'CheckedIn', 'Cancelled'), total amount, booking date 5. Confirm results are sorted by most recent booking first	Complete watch history displayed with comprehensive ticket details and proper chronological ordering	The watch history is displayed matches with the tickets bought, correctly sorted in chronological order. The information display include: Movie title, ticket ID, time, date, location.	Passed	Nhã Trần	03/08/2025	Desktop, Mobile	Ticket doesn't display status

Feature ID	Case ID	Test case name	Test step	Expected Result (ER)	Actual Result	Status	Tester	Tested Date	Tested Environment	Defects / Remark
VH	VH-02	Empty watch history display	1. Setup: Login as customer with valid authentication 2. Precondition: Verify customer has no previous bookings 3. Access "Watch History" section from user account menu 4. Verify appropriate empty state message is displayed 6. Confirm suggestion to browse movies and make first booking is shown	User-friendly empty state with "No booking history found".	The watch history list has no ticket item. The panel correctly reports this state, displaying "No watch history found"	Passed	Nhã Trần	03/08/2025	Desktop, Mobile	
VH	VH-03	Watch history pagination and status filtering	1. Setup: Login as customer with authentication 2. Precondition: Verify customer has 25+ tickets with mix of 'Confirmed', 'CheckedIn', and 'Cancelled' statuses 3. Access watch history page and verify pagination controls show (10 items per page) 4. Test status filtering options (All, Confirmed, CheckedIn, Cancelled) 5. Apply date range filtering (last 30 days, last 6 months, all time) 6. Test sorting by Date (ascending/descending) and Amount (high/low) 7. Navigate through multiple pages using pagination controls	Pagination works correctly, filters apply dynamically, and results update without page refresh	The watch history paginates correctly. However, the watch history screen doesn't provide any filter options.	Failed	Nhã Trần	03/08/2025	Desktop, Mobile	No filtering options
VH	VH-04	Unauthorized watch history access	1. Setup: Open browser without valid authentication (no JWT token or expired session) 2. Precondition: Verify user is not logged in or session has expired 3. Attempt to access watch history URL directly (/profile/watch-history) 4. System authentication middleware checks for valid JWT token 5. Verify authentication fails and user is redirected to login page 6. Complete successful login with valid credentials 7. Confirm system redirects back to watch history page after authentication	Unauthorized access blocked, proper login redirect, and successful return to intended page after authentication	After trying to accessing the watch history menu through direct url without being logged in, the website instead navigates to landing page	Failed	Nhã Trần	03/08/2025	Desktop, Mobile	Page doesn't navigate to log in page.
VH	VH-05	Detailed ticket information display	1. Setup: Login as customer with valid authentication 2. Precondition: Verify customer has booking history including both movie and snack tickets with promotions applied 3. Access watch history page and click on specific ticket entry 4. Verify detailed ticket modal displays: + Movie information (title, genre, duration, poster from Movie model) + Schedule details (branch, screen, startTime, endTime from Schedule model) + Seat selection details (seats array: ["A1", "A2"] from Ticket model) + Payment breakdown (base price, loyalty discounts, promotions from Promotion model) + Ticket status and check-in timestamp if status is 'CheckedIn' 5. Test navigation between different ticket types (Movie vs SnackTicket) 6. Verify QR code/ticket code display for valid tickets with proper formatting	Comprehensive ticket details with payment breakdown, loyalty information, and proper ticket validation display	After pressing the view button, the matching ticket is displayed, however, it is missing the ticket status	Passed	Nhã Trần	03/08/2025	Desktop, Mobile	Ticket is missing status
Function 11: Add/remove movie to wishlist										

Feature ID	Case ID	Test case name	Test step	Expected Result (ER)	Actual Result	Status	Tester	Tested Date	Tested Environment	Defects / Remark
AW	AW-01	Add a movie to wishlist (while logged in)	1. Log in as a customer. 2. Navigate to a movie's detail page. 3. Click the heart icon next to the movie title.	The heart icon changes state (coloured by red) to indicate it's in the wishlist.	Pressing the heart icon correctly colors the heart and adds it to the user's wishlist	Passed	Nhã Trần	03/08/2025	Desktop, Mobile	
AW	AW-02	Remove a movie from wishlist(while logged in)	1. Log in as a customer. 2. Navigate to a movie detail page that is already in the wishlist (the heart icon is filled). 3. Click the red filled heart icon.	The heart icon reverts to its original outline state to indicate it's in the wishlist.	Pressing the filled heart icon correctly removed the fill of the heart and remove it to the user's wishlist	Passed	Nhã Trần	03/08/2025	Desktop, Mobile	
AW	AW-03	Attempt to add to wishlist (while not logged in)	1. As a guest user, navigate to a movie detail page. 2. Click the 'Add to Wishlist' icon.	A pop-up or message appears, prompting the user to log in.	A pop-up appears on the top of the page with the message "Please login to save your favourite movies."	Passed	Nhã Trần	03/08/2025	Desktop, Mobile	
Function 12: View wishlist										
VW	VW-01	View non-empty wishlist	1. Log in as a customer. 2. Click on "Account" in header 3. Click the "wishlist" in user dashboard.	The page displays a list of all movies that the user has previously "heart".	The wishlist is displayed correctly, all the movie cards include a filled heart, indicating the wishlisted status	Passed	Nhã Trần	03/08/2025	Desktop, Mobile	
VW	VW-02	View empty wishlist	1. Log in to a new customer account with no items in the wishlist. 2. Navigate to the "Wishlist" page.	The page displays a message prompting the user to add something into it.	The wishlist has no movie item. The panel correctly reports this state, displaying "Your wishlist is empty. Start adding movies to your wishlist to see them here!"	Passed	Nhã Trần	03/08/2025	Desktop, Mobile	
VW	VW-03	View wishlist (not logged yet)	Navigate to the "Wishlist" page by URL	The page displays a message prompting the user to login.	After trying to accessing the wishlist menu through direct url without being logged in, the website instead navigates to landing page	Failed	Nhã Trần	03/08/2025	Desktop, Mobile	Page haven't displayed a message prompting the user to login.
Function 13: View movie details										
VD	VD-01	View movie details	1. Navigate to the "Now Showing" or "Upcoming" of landing page. 2. Click on title.	1. The user is navigated to the correct movie detail page. 2. The page displays full information: synopsis, trailer, cast, director, relevant movie, etc.	The same with ER	Passed	Thiên Lâm	03/08/2025	Desktop, Mobile	
VD	VD-02	View movie details (from Wishlist)	1. Navigate to the "Now Showing" or "Upcoming" of landing page. 2. Click on title.	The page displays full information: synopsis, trailer, cast, director, relevant movie, etc.	The same with ER	Passed	Thiên Lâm	03/08/2025	Desktop, Mobile	
VD	VD-03	View details (hover)	Hover on any Movie Card	Display short infomation of this movie	The same with ER	Passed	Thiên Lâm	03/08/2025	Desktop, Mobile	
Function 14: Buy ticket										

Feature ID	Case ID	Test case name	Test step	Expected Result (ER)	Actual Result	Status	Tester	Tested Date	Tested Environment	Defects / Remark
BT	BT-01	Online movie ticket purchase by customer	1. Navigate to the Buy ticket page. 2. Select preferred cinema branch, date, and showtime from Schedule model data 3. Choose available seats from interactive seat map (SeatLayout component) - seats marked as 'Normal', 'VIP', or 'Couple' types 4. Apply promotion code if available and verify loyalty rank discounts are calculated 5. Complete payment process and confirm booking details	Online ticket successfully purchased, QR code generated, and ticket available in customer's account	A ticket is displayed with all the correct information and QR of the ticket code. A seperate ticket is created for snacks and for seats (movies).	Passed	Nhã Trần	03/08/2025	Desktop, Mobile	
BT	BT-02	Walk-in ticket purchase by cashier	1. Login as cashier staff member with 'cashier' role at cinema counter 2. Navigate to ticket sales interface via staff dashboard 3. Select movie from available showtimes 4. Choose date and seats 5. Enter customer phone number for earning lunar points 6. Apply available promotions and calculate pricing with loyalty discounts 7. Print physical ticket and provide to customer 8. Verify ticket status is 'Confirmed' and properly recorded	Walk-in ticket successfully processed, physical ticket printed, and transaction recorded with cashier details	A ticket is displayed with all the correct information while the ticket is printing, employee ID isn't recored in the ticket.	Passed	Nhã Trần	03/08/2025	Desktop, Mobile	Employee ID isn't recored in the ticket.
BT	BT-03	Seat selection and availability validation	1. Customer accesses movie booking page for popular showtime 2. Attempt to select seats that are already occupied 3. Verify system prevents selection of occupied seats with appropriate error message 4. Select available seats of different types (Normal, VIP, Couple seats) 5. Verify pricing calculation reflects seat category pricing from SeatCategory model 6. Confirm seat selection updates real-time for other users attempting same showtime 7. Complete booking process and verify selected seats are marked as occupied	Seat selection system prevents double-booking, real-time availability updates, and proper seat category pricing applied	The ticket total is calculated correctly based on the amount of adult, and discounted ticket selected. It doesn't depend on the type of seat.	Failed	Nhã Trần	03/08/2025	Desktop, Mobile	The system doesn't differentiate between the type of seats.
